

1 Operating air conditioners

1-1 Request command for operating air conditioner

| | |
|---------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| POST /servlet/MIMEReceiveServlet HTTP/1.0 | } Fixed text |
| Content-type: text/xml | |
| Content-length: 242 | } Input length of the contents, which is between <?xml to </Packet> |
| | |
| <?xml version="1.0" encoding="UTF-8"?> | } Fixed text. Command is 'setRequest' |
| <Packet> | |
| <Command>setRequest</Command> | |
| <DatabaseManager> | |
| <Mnet Group="12" Drive="OFF" Mode="COOL" SetTemp="26" AirDirection="HORIZONTAL" FanSpeed="LOW" /> | } Input the item to operation |
| </DatabaseManager> | |
| </Packet> | |

1-2 Response command for operating air conditioner

| | |
|---------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| HTTP/1.1 200 NO ERROR | } When request command is correct, then 'HTTP/1.1 200 NO ERROR' is sent. When request command is not correct, then 'HTTP/1.1 500 ERROR' is sent. |
| date: Fri, 11 Oct 2002 12:58:20 GMT | |
| content-type: text/xml | } Date of G-50A |
| connection: close | |
| content-length: 239 | } Fixed text |
| | |
| <?xml version="1.0" encoding="UTF-8"?> | } Length of the contents, which is between <?xml to </Packet> |
| <Packet> | |
| <Command>setResponse</Command> | |
| <DatabaseManager> | |
| <Mnet Group="12" Drive="OFF" Mode="COOL" SetTemp="26" AirDirection="HORIZONTAL" FanSpeed="LOW" /> | } Same as request command |
| </DatabaseManager> | |
| </Packet> | |

Note: If you want to operate only mode, XML command is as follows.

```

:
<Mnet Group="1" Mode="COOL"/>
:
```

Note: If you want to turn on the group 1 and group 2 of air conditioners at a time, XML command is as follows.

```

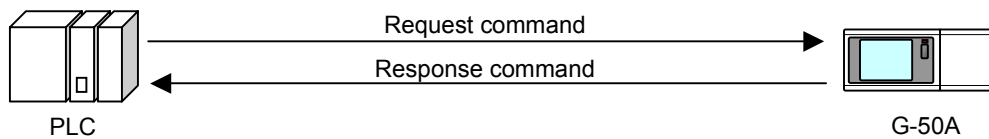

:
<Mnet Group="1" Drive="ON"/>
<Mnet Group="2" Drive="ON"/>
:
```

Property of operating command

| Property | Value | Info. |
|--------------|--------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Group | "1" to "50" | Group number of air conditioners |
| Drive | ON | Air conditioners turn ON. |
| | OFF | Air conditioners turn OFF. |
| Mode | COOL | Mode of Air conditioner |
| | DRY | |
| | FAN | |
| | HEAT | |
| | AUTO | Mode of LOSSNAY |
| | HEATRECOVERY | |
| | LC_AUTO | |
| | BYPASS | |
| SetTemp | "17" to "30" | Set the temp following range Mode is "COOL" or "Dry": 19 to 30 deg C Mode is "HEAT": 17 to 28 deg C Mode is "AUTO": 19 to 28 deg C |
| AirDirection | HORIZONTAL | Air direction of air conditioner |
| | MID1 | |
| | MID2 | |
| | VERTICAL | |
| | SWING | |
| FanSpeed | HIGH | FanSpeed of air conditioner or LOSSNAY |
| | MID1 | |
| | MID2 | |
| | LOW | |
| RemoCon | PROHIBIT | Prohibit or permit the following items If all prohibit items are "CHK_OFF" then set "PERMIT". |
| | PERMIT | |
| DriveItem | CHK_ON | If RemoCon = "PROHIBIT" and DriveItem = "CHK_ON", changing ON/OFF by remote controller is prohibited. |
| | CHK_OFF | |
| ModelItem | CHK_ON | If RemoCon = "PROHIBIT" and ModelItem = "CHK_ON", changing mode by remote controller is prohibited. |
| | CHK_OFF | |
| SetTempltem | CHK_ON | If RemoCon = "PROHIBIT" and SetTempltem = "CHK_ON", changing temperature by remote controller is prohibited. |
| | CHK_OFF | |
| FilterItem | CHK_ON | If RemoCon = "PROHIBIT" and FilterItem = "CHK_ON", resetting filter sign by remote controller is prohibited. |
| | CHK_OFF | |
| Ventilation | HIGH | Operation status of interlocked LOSSNAY or OA processing unit |
| | LOW | |
| | OFF | |
| FilterSign | RESET | Resetting the filter sign of the group (Setting only) |
| ErrorSign | RESET | Resetting the error sign of all units (Setting only) |

A1

2 Monitoring air conditioners

2-1 Request command for monitoring air conditioner

```

POST /servlet/MIMEReceiveServlet HTTP/1.0
Content-type: text/xml
Content-length: 227

<?xml version="1.0" encoding="UTF-8"?>
<Packet>
  <Command>getRequest</Command>
  <DatabaseManager>
    <Mnet Group="12" Drive="*" Mode="*" SetTemp="*" AirDirection="*" FanSpeed="*" />
  </DatabaseManager>
</Packet>
  
```

Fixed text

Input length of the contents, which is between <?xml to </Packet>

Fixed text. Command is 'getRequest'

Input the item to monitor

Fixed text

2-2 Response command for monitoring air conditioner

```

HTTP/1.1 200 NO ERROR
date: Fri, 11 Oct 2002 14:20:21 GMT
content-type: text/xml
connection: close
content-length: 239

<?xml version="1.0" encoding="UTF-8"?>
<Packet>
  <Command>getResponse</Command>
  <DatabaseManager>
    <Mnet Group="12" Drive="OFF" Mode="COOL" SetTemp="26" AirDirection="HORIZONTAL" FanSpeed="LOW" />
  </DatabaseManager>
</Packet>
  
```

When request command is correct, then 'HTTP/1.1 200 NO ERROR' is sent.
When request command is not correct, then 'HTTP/1.1 500 ERROR' is sent.

Date of G-50A

Fixed text

Length of the contents, which is between <?xml to </Packet>

Fixed text. Command is 'getResponse'

Current status is input

Fixed text

Note: If you want to monitor only mode, XML command is as follows.

```

:
<Mnet Group="1" Mode="*" />
:
  
```

Note: If you want to monitor the ON/OFF status of group 1 and group 2 of air conditioners at a time, XML command is as follows.

```

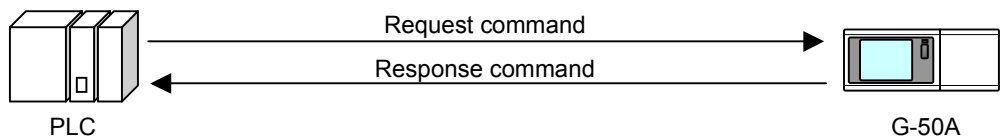

:
<Mnet Group="1" Drive="*" />
<Mnet Group="2" Drive="*" />
:
  
```

Property of monitoring command

| Property | Value | Info. |
|--------------|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Group | "1" to "50" | Group number of air conditioners |
| Drive | ON | Air conditioners turn ON. |
| | OFF | Air conditioners turn OFF. |
| Mode | COOL | Mode of Air conditioner "AUTOHEAT" and "AUTOCOOL" can't be set. They can be monitored only. |
| | DRY | |
| | FUN | |
| | HEAT | |
| | AUTO | |
| | AUTOHEAT | |
| | AUTOCOOL | |
| | HEATRECOVERY | Mode of LOSSNAY |
| | LC_AUTO | |
| | BYPASS | |
| SetTemp | "17" to "30" | Set the temp following range Mode is "COOL" or "Dry": 19 to 30 deg C Mode is "HEAT": 17 to 28 deg C Mode is "AUTO": 19 to 28 deg C |
| InletTemp | "0.0" to "99.9" | Only monitoring. |
| AirDirection | HORIZONTAL | Air direction of air conditioner |
| | MID1 | |
| | MID2 | |
| | VERTICAL | |
| | SWING | |
| FanSpeed | HIGH | FanSpeed of air conditioner or LOSSNAY |
| | MID1 | |
| | MID2 | |
| | LOW | |
| RemoCon | PROHIBIT | Prohibit or permit the following items If all prohibit items are "CHK_OFF" then set "PERMIT". |
| | PERMIT | |
| DriveItem | CHK_ON | If RemoCon = "PROHIBIT" and DriveItem = "CHK_ON", changing ON/OFF by remote controller is prohibited. |
| | CHK_OFF | |
| ModelItem | CHK_ON | If RemoCon = "PROHIBIT" and ModelItem = "CHK_ON", changing mode by remote controller is prohibited. |
| | CHK_OFF | |
| SetTempltem | CHK_ON | If RemoCon = "PROHIBIT" and SetTempltem = "CHK_ON", changing temperature by remote controller is prohibited. |
| | CHK_OFF | |
| FilterItem | CHK_ON | If RemoCon = "PROHIBIT" and FilterItem = "CHK_ON", resetting filter sign by remote controller is prohibited. |
| | CHK_OFF | |
| Ventilation | HIGH | Operation status of interlocked LOSSNAY or OA processing unit |
| | LOW | |
| | OFF | |
| FilterSign | ON | Filter sign status of the group (Monitoring only) |
| | OFF | |
| ErrorSign | ON | Error status of the group (Monitoring only) |
| | OFF | |

A2

3 Getting information of air conditioner's group

3-1 Request command for getting information of air conditioner's group

POST /servlet/MIMEReceiveServlet HTTP/1.0
Content-type: text/xml

Fixed text

Property of getting group information command

| Property | Value | Info. |
|----------|---------------------|------------------------------------------------------------------------------------------|
| Address | "1" to "50" | Address number of air conditioners |
| Group | "1" to "50" or "99" | Group number of air conditioners If the unit doesn't connect to G-50A, reply is "99". |
| Model | IC | Indoor unit (M-NET) |
| | KIC | Indoor unit (K control) |
| | AIC | Indoor unit (A control) |
| | LC | LOSSNAY |
| | FU | OA processing unit (Interlocked ventilation) |
| | OC | Outdoor unit |
| | OCi | Outdoor unit (Ice-Y) |
| | OS | Sub unit of Super-Y |
| | BC | Sub unit of R2 unit |
| | BS | |
| | IU | Sub unit of Ice-Y unit |
| | TU | |
| | RC | Remote controller |
| | SC | System controller |
| | KA | K converter |
| | ?? | The unit set to G-50A, but not connected |
| | NONE | The unit not set to G-50A |

4 Monitoring error code

3-1 Request command for monitoring error code

POST /servlet/MIMEReceiveServlet HTTP/1.0
 Content-type: text/xml
 Content-length: 2538

} Fixed text
 } Input length of the contents, which is between <?xml to </Packet>

```

<?xml version="1.0" encoding="UTF-8"?>
<Packet>
  <Command>getRequest</Command>
  <DatabaseManager>
    <Mnet Address="0" ErrorSign="*" AlarmCode="*" />
    <Mnet Address="1" ErrorSign="*" AlarmCode="*" />
    <Mnet Address="2" ErrorSign="*" AlarmCode="*" />
    <Mnet Address="51" ErrorSign="*" AlarmCode="*" />
    <Mnet Address="101" ErrorSign="*" AlarmCode="*" />
  </DatabaseManager>
</Packet>
  
```

Note: If you want to monitor only 1 unit, XML command is as follows.

```

<Packet>
  <Command>getRequest</Command>
  <DatabaseManager>
    <Mnet Address="1" ErrorSign="*" AlarmCode="*" />
  </DatabaseManager>
</Packet>
  
```

Please monitor only registered units in G-50A. If you monitor the not registered units, error response is sent.

3-2 Response command for monitoring error code

HTTP/1.1 200 NO ERROR

date: Tue, 15 Oct 2002 13:30:25 GMT

content-type: text/xml

connection: close

content-length: 433

When request command is correct, then 'HTTP/1.1 200 NO ERROR' is sent.

When request command is not correct, then 'HTTP/1.1 500 ERROR' is sent.

Date of G-50A

Fixed text

Length of the contents, which is between <?xml to </Packet>
